

DC-00WX Model

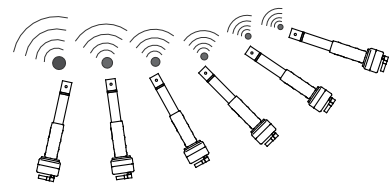

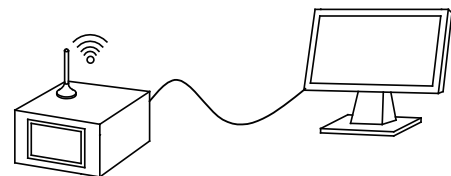

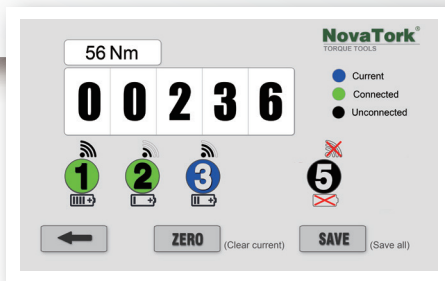

1-to-6 Wireless Torque Wrench Checking System

The "Click" signal wireless transmission system is designed for the production line when tightening the bolts. To record the count, this system ensures 100% tightening of bolts.

- Capture the "Click" signal of each wrench at any time and record it.
- Each wrench signal can be associated with a relay linkage. Normally open and contact can be controlled by user. There're 6 relay outputs totally.
- Can be connected to computer or server by cable.
- Touch Screen operation. You can enter the SN (serial number), MAC address, torque value and operator for each torque wrench.

Wireless Receiver System

- Preset torque wrench 340Nm or below specification.
- Wireless wrenches can be used at a radial distance of 20m; wireless frequency is 2.4GHz.

Wireless Sender Torque Wrench

- With a rechargeable battery of 3V, 1200mA.

Wireless Transmitter
