

PX Series Preset Airline Torque Screwdriver

There are many working conditions with such requirements: to ensure the distance below the set screw, the screw must be kept at a fixed distance from the bottom. This screwdriver can do it effectively.

- Close to working piece, better grip.
- 3/8" Square drive, meet most applications in the market.
- Tightening bolts or nuts with different size sockets easily.
- Center-hole design, tightening the set screws with nuts application by allen wrench and sockets.
- Preset desired torque.

USE CASE

When the screw is screwed into position:

Insert allen wrench into set screw's hexagon through the PX Torque Screwdriver, fix the screw and keep it from moving.

Holding allen wrench, socket fit with the nut, rotate the PX Torque Screwdriver in clockwise to tight the nuts, so that the set screw is fixed.

Note: In above sample, the allen wrench and socket are optional.

Item No.	Square Drive	Torque Range		Length mm	Width mm	Weight kg
		cN.m	Lb.in			
PX2160	3/8"	50-160	5-15	60	70	0.28
PX2360	3/8"	100-360	10-30	65	70	0.3

Allen wrench and socket are sold separately.
